WORLD ENVIRONMENT DAY 2026

World Environment Day, led by the United Nations Environment Programme (UNEP), is celebrated to raise awareness and inspire action to protect our planet. It brings people together across the world to tackle environmental issues such as pollution, and climate change. It encourages individuals, schools and communities to make positive changes, reminding us that everyone has a role to play in caring for the Earth and securing a healthier future for generations to come.

OAK WOOD SECONDARY

To mark World Environment Day, students from Oak Wood Secondary embraced a range of exciting activities. Staff led a special assembly and creative projects using recycled materials. Students then made a difference by participating in a litter pick in the local community.

MICHAEL DRAYTON JUNIOR

Although we value and care for our environment every day, pupils proudly celebrated World Environment Day. Children enjoyed a wonderful outdoor learning experience with a special visit to Hartshill Church. They explored the churchyard and took time to discover the amazing variety of wildlife that calls the peaceful space home. From listening to birdsong to spotting insects and plants growing all around them, the children were fully immersed in nature's classroom. It was a fantastic opportunity for them to observe the natural world up close and deepen their understanding of why it is so important to protect habitats and care for our planet. The children showed great curiosity, respect, and enthusiasm throughout the visit, and came away with a stronger appreciation of the environment around them. A truly inspiring week of outdoor learning and environmental awareness!

OAK WOOD PRIMARY

The Year Five pupils in Bonsai class visited the Habitat Survival Trust in Henley-in-Arden, where they: participated in dam building in the stream, enjoyed a woodland walk looking at different plants and trees, took part in a listening exercise in a 'camp fire' circle to listen to different birds and they also learnt about the bone structures of different animals.
